Amendments To The Claims

The listing of claims presented below will replace all prior versions, and listings, of claims in the application.

Listing of claims:

1. (currently amended) A test vehicle ball grid array package comprising:
 - a PCB having bonding fingers;
 - a single semiconductor chip having a plurality of bonding pads adhered on the PCB;
 - an adhesive material being coated on an edge of the PCB;
 - one or more sealing posts being adhered on the adhesive material,
 - wherein each sealing post comprises a vertical wall and an extrusion connected to a upper end of the vertical wall, and
 - further wherein the one or more sealing posts enclose the lateral sides of the single semiconductor chip on the PCB such that the extrusions connected to the one or more vertical walls are inside the enclosure without displacing ~~the~~ an enclosure space adjacent at least the middle and lower portion of the sealing post;
 - a plurality of metal wires separately connecting bonding pads of the PCB to the bonding fingers of the PCB;
 - a sealing cap adhered to the one or more extrusions connect to the vertical wall of the sealing post for sealing the single semiconductor chip from the top; and
 - a plurality of solder balls adhered to a lower side of the PCB.
2. (original) A test vehicle ball grid array package according to claim 1, wherein

each of the sealing post and the sealing cap is made from non-conductive material.

3-4. (cancelled)

5. (previously presented) A test vehicle ball grid array package according to claim 1, wherein the sealing cap is adhered on the extrusion of the sealing post by a low temperature thermoplastic tape or a material similar to low temperature thermoplastic tape.

6. (original) A test vehicle ball grid array package according to claim 1, wherein the semiconductor chip is a center pad-type chip or an edge pad-type chip.
